

CENTRAL INTELLIGENCE AGENCY
WASHINGTON, D.C. 20505

23 December 1981

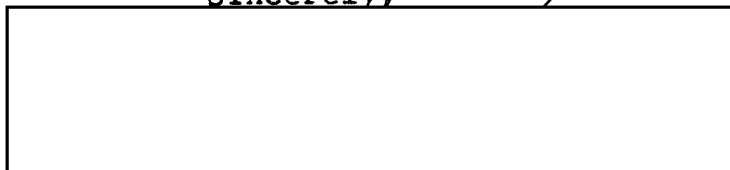

Mr. Barry B. Flachseart
Director of New Products
MCAUTO
McDonnell Douglas Automation
Company
P.O. Box 516
St. Louis, Missouri 63166

Dear Mr. Flachseart:

On 15 December, Messrs. R. V. Coleman, D. F. Morgan, and Bill Scheller of MCAUTO were good enough to meet with me and other Agency representatives to discuss the special engineering features incorporated in your MCAUTO Campus. The Agency is in the process of planning for a major new building at our Langley, Virginia, site, and the MCAUTO Campus had been recommended to us as one of the most flexible and reliable facilities designed in recent years to house both administrative and computer operations. Indeed, there were a number of approaches incorporated in the design that were totally new to those of us who visited, and we believe they have potential for inclusion in our new facility, which, hopefully, will be approved by Congress within the next few years.

Your officers could not have been more helpful or have given more freely of their time during the visit, and I would hope that you would express our appreciation to them. I would also like to thank Mr. Paul Czysz of the McDonnell Aircraft Company who, while not participating in the visit, made the initial arrangements.

Sincerely,

Deputy Director of Logistics
